

Civil Government Solutions (CGS)

The overall goal of the Civil Government Solutions (CGS) Business Unit is to provide our customers the IT services necessary to achieve their mission objectives. Our 1000+ employees serve federal civilian government agencies and State and Local government organizations with solutions across the entire IT spectrum including CIO governance support, IT infrastructure management, systems integration, systems engineering, software development, web-based solutions, and other IT services and solutions.

Our principle expertise is transforming customer operations to be more efficient and effective at the enterprise level. Business assurance and risk management are other practice areas in which we excel. Through these practices, we ensure that each IT project is organized and conducted so that customers realize their anticipated benefits and every project is completed on time and within budget. In addition to these practices, we deliver a variety of critical IT services for our customers, such as program management and CIO support, modeling and simulation, aviation support, business process outsourcing, case and grants management, and border and identity management. In all our work, we have attained very high levels of customer satisfaction across the board.

Our approach to service delivery is proactive rather than reactive. We leverage a broad range of experience, highly talented employees and industry leading best practices to deliver exceptional customer satisfaction. We believe that we can never be more successful than our customers. Our approach is to understand each customer's long term goals and objectives and then deliver a continuing stream of solid operational performance while implementing new capabilities or processes that achieve these objectives. Our focus is on quality in everything we do. Civil Government Solutions has played a key role in helping STRATIS achieve several of our ISO 9000 certifications and our CMMI Level 3 rating. Civil Government Solutions was also the first business unit in STRATIS to achieve ISO 20000 certification. In conjunction with our colleagues throughout the division, CGS is dedicated to many ongoing quality pursuits. We continually strive to bring our customers best value service.

Our customers include NASA, where we have served for over 30 years, HHS, NOAA, NRC, EPA, FAA, the Department of Labor, the Department of Justice, and a number of state and local contracts in Maryland, Florida, Oklahoma, and North Carolina.

L-3 STRATIS Profile

L-3 STRATIS is one of the largest divisions of L-3, a worldwide defense contractor with annual revenues of nearly \$16 Billion and approximately 67,000 employees. Included among its customers are the U.S. Department of Defense, the Intelligence Community, numerous federal, state, and municipal government bodies in the U.S., as well as national government agencies and commercial enterprises in countries across the globe. STRATIS' 5000 employees apply industry best practices in their delivery of advanced enterprise information technology and intelligence solutions, while maintaining the highest standards of business ethics. STRATIS is *Powered by Excellence*.

During its more than 30 years of service, STRATIS has successfully delivered solutions in managed IT services, business assurance and governance, mission and business applications, cyber security, intelligence analysis and support, and health solutions. It is recognized for its enterprise-wide quality management systems, its world-class project management offerings, and its rigorous adherence to standards-based processes.
